JAN TERENCE FRANCISCO

SENIOR FULLSTACK DEVELOPER

jtfrancisco21@gmail.com • jtfrancisco0121.github.io • github.com/jtfrancisco0121

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer who owns systems end-to-end across Go, TypeScript/React, Java/Spring Boot, and Python. Shipped DATARK at Koneksi (File DR, notifications, billing, 300+ Playwright tests) and greenfield Torrecamps apps; previously stabilized Philtech retail production. Strong in system design, APIs, and AI-assisted spec→code workflows.

WORK EXPERIENCE

Senior Fullstack Developer — **Oct 2025 - Oct 2026**

Koneksi Inc.

- Owned DATARK end-to-end across backend (Go), web and desktop (TypeScript): APIs, product surfaces, and quality gates.
- Designed and shipped the notification system (Asynq/AsynqMon, role-segregated delivery) and role-based onboarding across web and desktop.
- Built File Disaster Recovery & Compliance — scoring engine, control matrix, audit ledger, Korean PDF reporting, Org Admin dashboard, on-demand recovery testing, retention, and file preview.
- Hardened storage reliability: S3 gateway/credentials redesign and engine realtime-backup recovery (CID correctness, retry/backoff, resumable downloads).
- Built and maintained desktop Playwright E2E (300+ tests in CI); shipped promo/billing + timezone fixes; JWT/SA APIs, OpenAPI, Postman; reviewed PRs.

Software Consultant — **May 2026 - Present**

Torrecamps Marketing

- Built TMEcommWeb (Next.js, TypeScript, Tailwind, Drizzle, PostgreSQL, Auth.js): B2B portal with Zoho-gated admin, registration→Contact approval, per-customer price book, admin-created Zoho draft invoices; Railway + ~400 Vitest/Playwright tests.
- Added messaging (S3, Web Push), PWA, Zoho catalog/stock sync, and a shared Zoho API daily budget; built TMZohoBooksInteg (FastAPI) for invoices/bills/stock, Daily Sales, AR aging, PH BIR VAT/EWT, and payroll→Zoho expenses.
- Designed print-layout/calibration and PDF/Excel export (WeasyPrint, openpyxl) for invoices, receipts, and cheques; Docker/Railway + Windows launcher.
- Used Cursor, Claude, and Grok with written specs and agent handoffs across Torrecamps and Koneksi (plan→implement, tests, repo audits) with human review before merge/ship.

Software Engineer I — **Sept 2024 - Oct 2025**

Philtech Inc.

- Resolved ESL, scale, SignShop, and POS incidents under time pressure; automated tag forecasting and ESL monitoring for stuck HOST→Aperion batches.
- Built a Python queue/wait-time dashboard; stood up SharePoint for Philtech HR.

EDUCATION

ASIA PACIFIC COLLEGE

BS IT - Mobile and Internet Technologies · 2019-2024

CAPSTONE - Ecommerce Website

Laravel, JavaScript, SQL

SKILLS

- Frontend — TypeScript, React, Next.js, Tailwind
- Backend — Go, Python/FastAPI, Java, JWT, OpenAPI, Asynq
- Data — PostgreSQL, SQL Server, MySQL, IPFS, S3
- Integrations — Zoho Books/Inventory, Auth.js, OAuth, Web Push
- Delivery — Docker, Railway, Git/GitHub, Playwright, Vitest/pytest
- Tooling — Cursor IDE, VS Code, IntelliJ, PyCharm
- AI agents — Cursor, Claude, Grok
- Prompt design for coding agents — constraints, success criteria, review gates
- Agent handoffs / context packs — READMEs, AGENTS.md-style briefs
- Spec-to-code / plan-then-implement loops
- AI-assisted test generation + human verification
- Tool-using agents — repo search, PR/diff review, docs
